Re: Improving Wireless Emergency Alerts and Community-Initiated Alerting, PS Docket No. 15-91.; Amendment to Part 11 of the Commission's Rules Regarding the Emergency Alert System, PS Docket 15-94

Dear Ms. Dortch:

On Friday, July 7th, 2017, Christi Shewman, Brian Daly, and the undersigned from AT&T met by phone with Megan Henry, James Wiley, and Eric Manski of the Public Safety and Homeland Security Bureau on the above captioned proceeding. The Public Safety Bureau asked technical questions related to Wireless Emergency Alerts concerning congestion on the Cell Broadcast network, integrating improvements into WEA, a proposal to create a well-managed standardized over the top application to process new WEA alerts, improved geo-targeting for WEA Alerts, multi-lingual WEA alerts, and Multi-media being included in WEA Alerts. AT&T provided responses to these questions that were consistent with previously filed comments¹ by AT&T.

Pursuant to the Commission's rules, a copy of this notice is being filed electronically in the above-referenced docket. Please do not hesitate to call me if you have questions.

Sincerely,

/s/ Joseph P. Marx
Assistant Vice President, AT&T Services Inc.
